# Sheetmetal Glam Slam!!

## AUTOStyling Challenge

If you like cars dressed to the nines, inside and outside, with all manner of aero body accessories and gadgets and gizmos, then the AUTOStyling Challenge organised by MPT Motor Trading is just the event for you.

The AUTOStyling Challenge is essentially an automotive beauty contest and there were many 'beauties' present for the judges to look over. Chief judge Mr. Amos Lim, marketing Manager, Karat Trading Pte Ltd, distributors of ENOC lubricants, together with judge Mr. Christopher Ang, Account Manager, WKRZ 91.3 and Mr. Koh Aik Leong, Managing Director, MPT Motor Trading, had the unenviable task of judging the many cars on display and they spent a good part of one hour doing so.

The standard of the cars on display was super-high as many of these cars have won multiple awards in similar contests. Imagine a BMW 3-series sedan with an in-car game console and a MITSUBISHI Lancer sedan with a super-wide body, fully customized bodykit and you will understand how radical and impressive some of the entries were. All three judges had a tough time awarding points in the respective scoring systems. But after much deliberation, the winners were found and DJ Jansen Ho from WKRZ 91.3 rounded off the event with a prize presentation ceremony for the AUTOStyling Challenge.

Look out for next AUTOStyling Challenge at the next rounds of the ENOC SuperSpecial Rally Series 2006 scheduled for September and October.
